## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Keum et al, US Patent 5,838,803. Keum discloses a muting circuit comprising mute signals  $M_1, M_2, \dots M_n$  which are inherently connected to mute operation switches each operative to assume two operation states. Current controlled amplifiers (CCAs)  $400_1, 400_2, \dots 400_n$  represent mute executing switches operative to assume two executing states consisting of a mute-on and mute-off. Pulse generating portion 50 which generates signals PP and PN acts as a mute switch control data generating means for generating mute switch control data elements indicative of the operation states of the mute operation switches, the signals PP and PN being the control data elements. Switching signal generating portion 150 represents control data determining means for determining whether the CCAs 400 assume a mute-on or mute-off state. Controllers 300 read on the mute switch control means that control the CCAs to have a mute-on or mute-off state based on the state determined by the switching signal generating portion. Claim 1 is met. The method claim 7 is met by the apparatus of Keum.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2644

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Keum.

Keum does not explicitly disclose a switch state display means for selectively displaying the mute-on and mute-off states of the mute operation switches. Examiner takes Official Notice that the use and benefit of displaying the mute state of an audio apparatus was well known at the time of invention. The advantage of displaying the mute state was to demonstrate to the user that the audio apparatus was functioning properly and the cause of no sound output was due to the mute state.

#### ***Allowable Subject Matter***

Claims 3-6, 9-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian T. Pendleton whose telephone number is (703) 305-9509. The examiner can normally be reached on M-F 7-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Forester W. Isen can be reached on (703) 305-4386. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
